An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Claims 1-3 and 7 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a method of making sandwich having the specific steps of inserting the plurality of layers of sandwich fixings into the cavity of the bread as recited in claim 3, does not reasonably provide enablement for the methods steps recited in claim 1. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to carry out the invention commensurate in scope with these claims.

Claim 1 recites a method for making a sandwich which includes the step of "providing a plurality of layers of sandwich fixings in separate and arcuate layers". The sandwich fixings cannot be in arcuate layers unless they are placed on the flexible sheet and the sheet is rolled up. This step cannot be carried out without the flexible sheet. One skilled in the art cannot carry out the method commensurate in scope with claim 1 because one would not know how to provide a plurality of layers of sandwich fixings in separate and arcuate layers.

Claims 1-7 and 14-19 and 24-29 are free of prior art because there is no teaching of the steps " providing a plurality of layers of sandwich fixings in separate and arcuate layers and forming separate and arcuate layers of sandwich fixings in the cavity. There is no teaching of the steps of inserting sandwich fixings as recited in claims 14 and 25.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bemis discloses a process of making sandwich product.
